

MAZEN REDA NASR MOHAMED

Cybersecurity Student | Penetration Tester

+201003609942 | mazen.reda1@msa.edu.eg | mazenreda116@gmail.com
| [GitHub: mazenreda2005](#) | Giza, Egypt [LinkedIn](#)

OBJECTIVE

Computer Science student seeking a Cybersecurity Internship to apply knowledge in network security, vulnerability assessment, and penetration testing. Passionate about identifying threats and securing systems.

EDUCATION

October University for Modern Sciences & Arts (MSA) — Faculty of Computer Science
Expected Graduation: 2027

EXPERIENCE

Penetration Tester Trainee | Instant Software Solutions | Dec 2024 – Jan 2025 (1 Month)

- Completed 150-hour Cyber Security Diploma covering offensive and defensive techniques
- Performed hands-on penetration testing labs and real-world attack scenario exercises
- Practiced network scanning, traffic analysis, and web vulnerability exploitation

COURSES & CERTIFICATIONS

Cybersecurity Academy (Undergraduate Level)

NTI | Ministry of Communications & IT • EG-CERT • NTRA | 2025 | 60 Technical hrs + 12 Freelance hrs

Full Stack Web Development using PHP

ITI (Information Technology Institute) | Aug 5 – Sep 2, 2025 | 126 hrs (PHP, Laravel, MySQL, Client-Side)

Cyber Security Diploma

Instant Software Solutions | Completed Jan 15, 2025 | 150 hrs

TECHNICAL SKILLS

- Cybersecurity:** Penetration Testing, Vulnerability Assessment, XSS, SQL Injection, Network Scanning
- Tools:** Nmap, Burp Suite, Wireshark, Kali Linux
- Networking:** TCP/IP, OSI Model, Network Fundamentals
- Programming:** C++, PHP, Python (Basic)
- Web Development:** HTML, CSS, Laravel, MySQL
- Operating Systems:** Windows, Linux (Kali Linux)

PROJECTS

Football Field Booking Website

PHP • Laravel • MySQL

- Built full booking system with user authentication and role-based access control
- Applied security practices including input sanitization and SQL injection prevention

E-Commerce Website — Tech Store

- Developed complete online store with product management and secure checkout flow
- Implemented input validation and secure handling to prevent common web vulnerabilities

Blog Website

Laravel • MVC Architecture

- Implemented authentication, authorization, and validation following MVC pattern

Hotel Booking System

C++ • Console Application

- Console-based reservation system with input validation and structured data management

CYBERSECURITY PRACTICE

- **Nmap** Network reconnaissance and host discovery using
- **Burp Suite** Web application vulnerability testing (XSS, SQLi, broken auth) using
- **Wireshark** Network traffic capture and protocol analysis using
- **Kali Linux** Practiced offensive techniques in controlled lab environments on
