Professional Summary

Computer Science student (MSA, expected 2027) building practical AWS Cloud Security skills through hands-on labs in IAM, VPC networking, EC2, S3, and CloudTrail. Experienced in applying least-privilege access control, configuring Security Groups and public/private subnet architectures, and identifying and remediating common cloud misconfigurations. Background in penetration testing, network traffic analysis, and Python-based packet analysis. Seeking an entry-level Cloud Security Engineer or Cloud Security Intern role to apply IAM, cloud networking, and logging and monitoring skills.

Technical Skills

- **Cloud Security (AWS):** IAM (users, roles, policies, permissions), Least Privilege, Access Control, EC2, S3 Access Control, VPC, CloudTrail, Logging and Monitoring, Cloud Misconfiguration Identification, Security Remediation, AWS CLI
- **Cloud Networking:** VPC Design, Public and Private Subnets, Route Tables, Internet Gateway, NAT Gateway, Security Groups (inbound/outbound rules)
- **Cybersecurity:** Penetration Testing, Vulnerability Assessment, Network Scanning, Traffic Analysis, Web Application Security (XSS, SQL Injection)
- **Security Tools:** Nmap, Burp Suite, Wireshark, Kali Linux
- **Networking:** TCP/IP, OSI Model, Routing, Subnetting, Packet Analysis (Ethernet, IPv4/IPv6, TCP, UDP, ICMP, DNS)
- **Operating Systems:** Linux, Kali Linux, Windows
- **Programming:** Python (basic), C++, PHP
- **Web Development:** Laravel, MySQL, HTML, CSS

Cloud Security / AWS Hands-on Experience

Hands-on AWS Cloud Security Labs and Projects | AWS Academy / Vocareum lab environments | Ongoing

- Configured IAM users, roles, and policies applying least-privilege principles to control access to AWS resources.
- Built VPC environments with public and private subnets, route tables, an Internet Gateway, and a NAT Gateway to separate internet-facing and internal workloads.
- Configured Security Group inbound and outbound rules to restrict EC2 instance exposure to required ports and sources.
- Applied S3 access control settings to protect bucket data from unintended public access.
- Enabled and reviewed AWS CloudTrail logs to monitor account activity and API calls.
- Identified common cloud misconfigurations (overly permissive access, open network rules) and applied basic remediation.
- Troubleshoot connectivity and permission issues using the AWS Console, AWS CLI, and Linux command line.

Cybersecurity Experience

Penetration Tester Trainee | Instant Software Solutions | Dec 2024 – Jan 2025

- Completed hands-on penetration testing labs and attack-scenario exercises covering offensive and defensive security techniques.
- Performed network scanning and traffic analysis using Nmap and Wireshark.
- Identified and exploited web vulnerabilities, including XSS and SQL injection, using Burp Suite in lab environments.

Projects

Network Sniffer & Packet Analyzer | Python, Raw Sockets, Linux | [GitHub](#)

- Built a Python packet capture tool using raw AF_PACKET sockets with no external libraries, parsing Ethernet, IPv4/IPv6, TCP, UDP, and ICMP headers byte-by-byte.
- Added protocol detection (HTTP, HTTPS, DNS, SSH, RDP, MySQL), filtering by protocol, host, or port, traffic statistics, and JSONL export for offline analysis.

Football Field Booking Website | PHP, Laravel, MySQL

- Built a booking system with authentication and role-based access control (RBAC).
- Applied input validation and SQL injection prevention.

E-Commerce Website (Tech Store) and Blog Website | Laravel, MVC

- Implemented authentication, authorization, input validation, and secure data handling across two web applications.

Education

Bachelor of Computer Science | October University for Modern Sciences & Arts (MSA), Giza, Egypt | Expected Graduation: 2027

Certifications & Training

- **Cybersecurity Academy (Undergraduate Level)** | NTI, in partnership with the Ministry of Communications & IT, EG-CERT, and NTRA | 2025 | 60 technical hours + 12 freelance hours
- **Cyber Security Diploma** | Instant Software Solutions | Jan 2025 | 150 hours
- **Full Stack Web Development using PHP** | ITI – Information Technology Institute | Aug – Sep 2025 | 126 hours
